Subject: PHP and E – Commerce
Project Assignment: Pizza Ordering Website

Question: Design a webpage for pizza ordering system using PHP. Insert, update, delete and display the order details from database.

Project Description and Functionality:

This is a project which depicts Pizza Land, an online Pizza ordering Website.

This Website Contains 5 Pages, each of which performs the following functions:

- **Home**
  - The Homepage contains the basic information and Contact details of Pizza Land.
  - It explains and motivates the user to use this online Ordering Service.
- **Menu**
  - The Menu contains all the details about Pizzas and Side dishes provided by Pizza Land.
- **New Order**
  - The New Order page contains the steps to Order a Pizza and provides an HTML form to fill all the Information.
  - This form uses the POST method to transfer the entered data to the server.
  - This form performs two actions:
    - To Calculate Total Order Amount: It performs this by Refreshing the page and running the PHP code present in it.
    - To Place Order: It performs this by implementing Order Confirmation.php, i.e. when the user clicks on Place Order button (This Second Submit button is implemented with the help of formaction attribute).
  - This page also provides the information about where to View, Update or Cancel the Order.
- **View Order**
  - The View Order page contains the steps to View and Update an Order and provides two respective HTML forms to fill all the Information.
  - This forms also use the POST method to transfer the entered data to the server.
  - This page performs two actions:
    - To View Order: It performs this by implementing View.php.
    - To Update Order: It performs this by implementing Update.php.
- **Cancel Order**
  - The Cancel Order page contains the steps to Cancel an Order and provides an HTML form to fill all the Information.
  - This form also uses the POST method to transfer the entered data to the server.

- o It performs the Cancel Order operation by implementing Delete.php.
- This Website contains a Menu to Navigate through all the different pages.
- **Note:** This Website is optimized for 4:3 Aspect Ratio.

Project Material:

- This is a link to the Source folder for the whole Project, including HTML and PHP files, Images and SQL.
  - o https://drive.google.com/drive/folders/1DEg7yziLhtTC3MHSjN1E4knJDcDecMLb ?usp=sharing
- This is a link to a Working Video Demo of the Website.
  - o https://drive.google.com/file/d/1jdaO5NO5e- KDXLxbE96PzX4e5AGimC23/view?usp=sharing

Implementation (Codes):

- All the Codes here are formatted with the help of Source – Code formatting Tool.
- Kindly refer to the Source folder for inconsistent indentation present below.

Home Page:

Code:

```
